Academic Integrity

The implications of academic dishonesty are far-reaching in their ability to erode the functions of education and research; it is therefore crucial that academic integrity be preserved at all levels of the educative/research process. Instances of academic dishonesty may include, but are not limited to, the following:

- Cheating, which is the use of materials (including papers purchased or acquired from individuals, internet websites, etc.), study aids, etc. for testing and assignments, that are not authorized by the instructor
- Plagiarism, which is the presentation of information, content, or wording that originates from another source as one’s own
- Conspiring in or aiding and abetting of dishonest behavior, such as knowingly providing materials from which another may cheat
- Falsification or invention of material for academic work
